

How To: Enter Weight (Fun Day Mode)

Step 1: Choose Your Species

Use the Species Spinner to select the type of fish you caught.

Example options include: Large Mouth, Crappie, Pike, and more.

Tap to open the list, then tap again to select.

Step 2: Enter the Weight

Weight is entered in Pounds and Ounces:

- Pounds (lbs): Two dials (0-9 and 0-9 for up to 99 lbs)
- Ounces (oz): One dial from 0-15 (since there are 16 oz in a pound)

Note: You must enter at least 1 ounce to enable the "Save Catch" button.

Step 3: Add Location (Optional)

If GPS is turned on:

- Your phone will automatically attach the location of the catch.
- This is helpful for tracking patterns or secret spots.

Step 4: Save Your Catch

Tap the Save Catch button.

- Your catch will be added to the list below for today.
- After saving, the dials will reset so you're ready for the next fish.

Step 5: Review Your Catches

Scroll through the catch log to see what you've caught today.

- Want to remove a catch? Long-press it and confirm deletion in the popup.

Tips for Success

- Keep ounces below 16 - 16 oz becomes 1 lb automatically.
- Only today's catches will show in the list.
- All catches are stored and can be reviewed in the main log later.
