

Bass Angler Tracker - How To: Tournament Mode (Weight Entry)

Purpose

Tournament Mode is for tracking your best catches during competitive events. You can sort fish by weight and only the top 4, 5, or 6 fish count toward your final total. Each fish can be tagged with a unique clip color for visual tracking.

Getting Started

1. From the Set Up menu, select 'Tournament Mode'.

Select Measurement Type and the Units for the Tournament

Select the Culling Limit and the Target Species for the Tournament

Select the Start Fishing Event to open the Tournament page matching your selections above

The screenshot shows the 'Set Up' screen of the 'CATCH&CALL TRACKER' app. The screen is divided into several sections with orange arrows pointing to specific options:

- Type of Measuring:** A row with two buttons: 'WEIGHT' (highlighted in green) and 'LENGTH' (grey).
- Type of Units:** A row with two buttons: 'LBS OZS' (highlighted in green) and 'KGS' (grey).
- Type of Fishing Day:** A row with two buttons: 'FUN DAY' (grey) and 'TOURNAMENT' (highlighted in green).
- Culling # -- Tournament Species:** A row with a button showing the number '4' (highlighted in blue) and a dropdown menu for species selection.
- START:** A yellow button at the bottom right of the main setup area.
- MAIN PAGE:** A yellow button at the bottom left.
- LIST:** A yellow button at the bottom right.

The species dropdown menu is open, showing the following options with fish icons:

- largemouth
- smallmouth
- crappie
- walleye
- catfish
- perch

2. Use the setup page to configure:

- Tournament species (e.g., Walleye, Small Mouth, etc.)
- Catch limit (4, 5, or 6 fish)
- Measurement system
 - (lbs./oz or kgs)
 - (inches or cms)
- Enable GPS if needed

Entering a Catch

1. Tap 'Add Catch' to open the popup.
2. Enter weight using the lbs./oz spinners (or the others as configured).
3. Choose the species (if bass, pick Large or Small Mouth).
4. Either use the pre-selected clip color or you can select from an available clip color (e.g., Red, Blue, Green, etc.).
4. Tap 'Save' to add your fish to the list.

What Happens Next

- Only the top N (4, 5, or 6) heaviest fish count.
- Each fish appears on the culling board with its weight and assigned color.
- The board updates automatically as heavier catches replace lighter ones.
- The total weight is recalculated live.

ALARM (Optional)

If you need to be back at a specific time the alarm is a great way to get you back on time. Just select the "Alarm" button select the time and you are set.

GPS Location (Optional)

If GPS is enabled in the Setup page, location is recorded the moment you save each fish. This allows for catch location tracking without keeping GPS on constantly.
