

Bass Angler Tracker - (Fun Day Mode)

1. Selecting Measurement Type

On the main menu, tap 'Fun Day'. You will be prompted to select how you want to measure your fish: 'Weight' or 'Length'. Choose 'Length' to begin logging fish based on their size.

Length Entry Screen

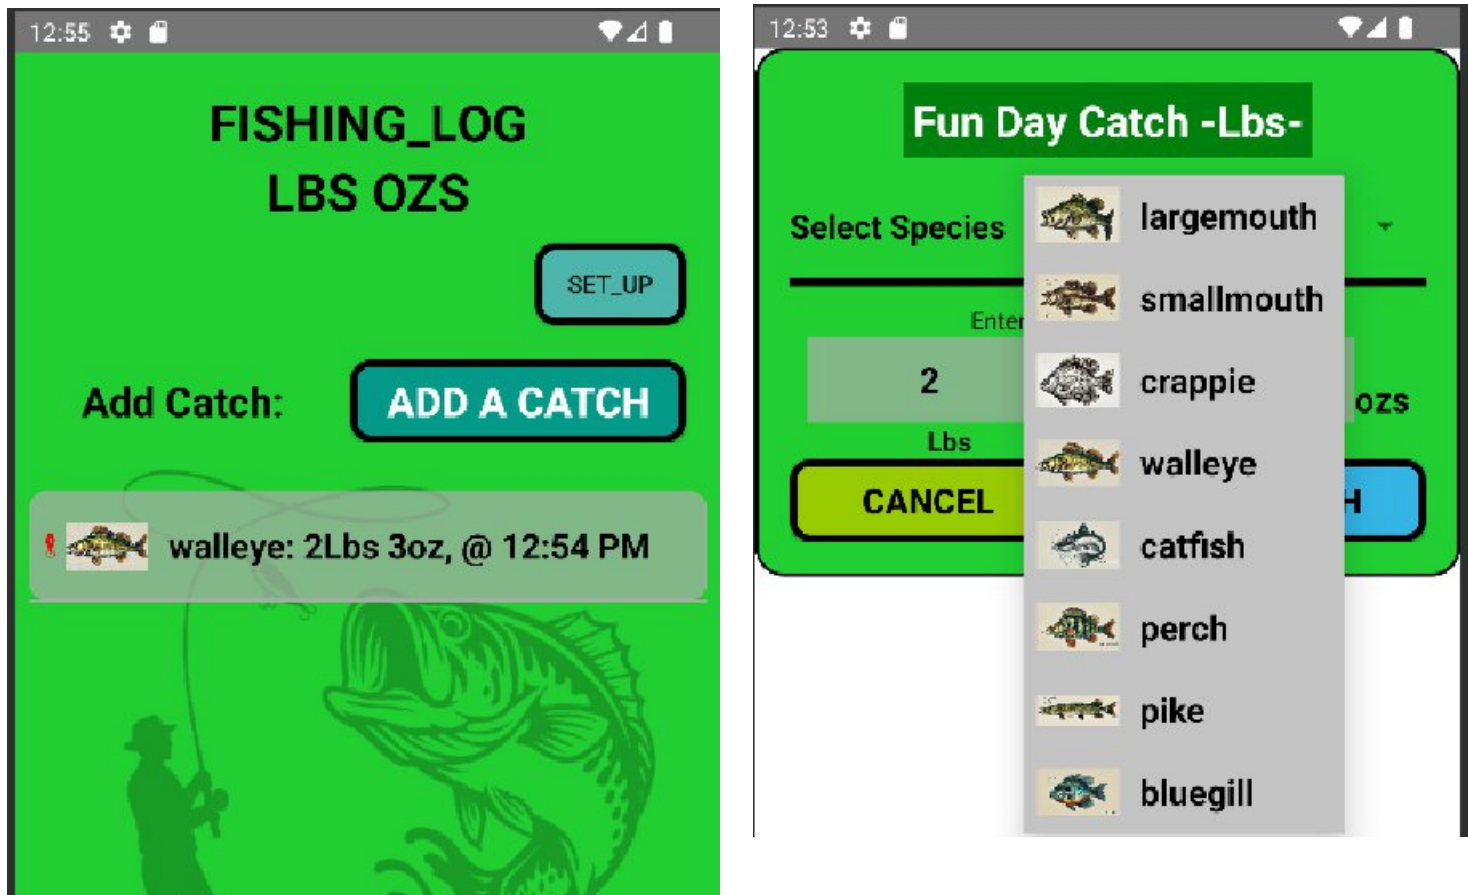

Once on the Length Entry screen, you'll see options to enter:

- Species of Fish
- Whole Inches (e.g., 14 inches)
- 1/8th Inch Increments (e.g., +3/8 inch)

Use the dropdowns or spinners to select the correct values for the fish you caught.

3. Adding a Catch

After you caught your fish simply select the “Add a Catch” button. The popup screen will appear where you can select the species from the species list and enter the size, for weight it will be Lbs. and oz or Kgs, and for length you can have Inches and 8ths of inch or Cm and mm.

aving the Catch

After selecting the correct species and length, tap 'Save Catch'. Your entry will be stored for the day and added to the visible log above. Not the red pin icon in front of the species image, this notes that the catch was logged with the GPS location. Only catches from today will appear in this list. The catch will be saved on your device in the internal memory for you to view or share.

5. Editing Your Catches

You can long-press an entry to delete it.
