

Catch and Call Tracker

Manual Mode

Fishing Logger – Internal Test Release

Available for iOS and Android cellphones

Welcome to the **first tester release** of Catch and Call's manual logging system. This version is named the Catch and Call Tracker version, and it includes full functions for tournament and fun-day tracking and logging via manual inputs.

✓ What's Included

- 🎣 **Fun Day & Tournament Modes** (lbs/oz, pounds, kgs, inches, cm)
- 🧠 **Manual logging** of catches: species, weight, length, clip color
- 🏆 **Tournament mode culling logic** showing species and clip color
- ➕ **Add Species** to listing with icon, ensuring the catch is logged properly
- 📍 **GPS-tagged catches** (if GPS is enabled, data does not leave your cellphone)
- 🗺️ **Catch Map, Data Sharing and Map Query View**
- 🚫 **Limited ads** (on Android to test advertising interaction)

⚠️ Known Limitations

- 🔍 Some buttons/pages are still being polished — report anything that is unclear

📄 🧑 Practice Using Catch and Call Tracker

- ✏️ Just because you are not fishing does not mean you can not test out the 🧑 Catch and Call Tracker app.
- Add a catch when you are out and about 🚗. Look up your catches on the map to see how close your GPS records locations 🕶️
- Check out the "add", "edit", and the "delete new species" feature.

How to Give Feedback

Please report:

- Any confusing voice responses or misheard commands
- UI issues (missing prompts, freezing, bad layout)
- Share how the app is laid out on your version of cellphone
- Any catches that **did not save**, or saved incorrectly
