Catch and Call - How To: Sharing Catch Data (CSV Export)

Overview
You can export your catch data as a CSV (Comma-Separated Values) file for sharing or recordkeeping. The file includes species, weight, length, date/time, GPS (if available), and catch type.

1. Opening the Share Menu
- **From the Main Menu, tap "View and Share Logs".**
- **Tap "Export Catch Data" to generate a CSV file of your log.**

2. What's in the CSV File
- **The CSV includes the following fields for each catch:**
  - **Date and Time**
  - **Species**
  - **Weight (in standard units like total ounces or kg)**
  - **Length (in inches + 8ths or cm)**
  - **Catch Type (Fun Day / Tournament)**
  - **GPS Coordinates (if enabled)**

3. Sharing the CSV File
- **Once the file is generated, the app will prompt you to choose a sharing method:**
  - **Email**
  - **Google Drive**
  - **Text or Messenger**
  - **Any other installed file-sharing app**
- **Tap your preferred method and follow the steps to send.**

4. Where the File is Stored
- **The CSV file is saved in your phone's local storage using secure File Provider access.**
- **The file is temporary and may be overwritten if exported again with the same name.**

Additional Notes:
- **CSV files can be opened in Excel, Google Sheets, or any text editor.**
- **You can export your full log or filtered results depending on the screen used.**
- **Make sure file sharing apps have permission to access files if prompted.**

Select Data to Share

- ☐ Include Date and Time
- ☐ Include Species
- ☐ Include Weight
- ☐ Include Length
- ☐ Include GPS Coordinates
- ☐ Include Day Type (Fun Day/Tournament)
