Bass Angler Tracker - How To: Tournament Mode (Weight Entry)

Purpose

Tournament Mode is for tracking your best catches during competitive events. You can sort fish by weight and only the top 4, 5, or 6 fish count toward your final total. Each fish can be tagged with a unique clip color for visual tracking.

Getting Started

1. From the main menu, select 'Tournament Mode'.

2. Use the setup page to configure:

   - Tournament species (e.g., Walleye, Small Mouth, etc.)

   - Catch limit (4, 5, or 6 fish)

   - Measurement system (lbs/oz or kgs)

   - Enable GPS if needed

Entering a Catch

1. Tap 'Add Catch' to open the popup.

2. Enter weight using the lbs/oz spinners (or kgs if configured).

3. Choose the species (if bass, pick Large or Small Mouth).

4. Pick an available clip color (e.g., Red, Blue, Green, etc.).

5. Tap 'Save' to add your fish.

What Happens Next

- Only the top N (4, 5, or 6) heaviest fish count.

- Each fish appears on the culling board with its weight and assigned color.

- The board updates automatically as heavier catches replace lighter ones.

- The total weight is recalculated live.

GPS Location (Optional)

If GPS is enabled in the Setup page, location is recorded at the moment you save each fish. This allows for catch location tracking without keeping GPS on constantly.

Tips

- Bass tournaments can include both Large and Small Mouth species.

- Clip colors help you identify fish for quick swaps.

- Set an alarm to remind yourself when the tournament ends!

■ Tournament Mode - Weight Entry (Lbs/Ozs or Kg)

This mode is designed for competitive fishing days where only your top 4, 5, or 6 fish count toward your tournament weight.

Setup (Before You Start Fishing)
1. Go to the SetUp Page
   - Choose Tournament Mode
   - Select Lbs/Ozs or Kg
   - Choose the Number of Fish to Keep (4, 5, or 6)
   - Choose your Target Species
   - Enable or disable Culling and GPS logging

Note:
If you choose Large Mouth or Small Mouth Bass as your tournament species, the entry page will allow you to select either Large Mouth or Small Mouth for each catch. The species you selected on the setup page will appear first in the dropdown for faster access.
